

We had 8 members present, it was nice to see John Hope who came to join us

Mary North was unable to come but she sent her pictures.

The project given to members for this months activity was to immerse a flower in a bowl of water and freeze it and then take photos of the result and we had a wonderful showing of photos. Everyone had gone the extra mile with some great results. I hope to have some of these photos put onto the SeniorNet Web Site for the rest of the membership to view. John Hope showed some of his best photos and explained the composition of taking a good photo.

Then I gave a little tuition on files and folders – showing how to organize your photos and keeping them in order.

We were that busy we didn't have time to talk about next month.

So as previously decided we will go on an outing. Meet at the club at 2 pm if it is fine we will go either go to Brooklyn or if anyone has another idea please let me know (it was mentioned that the Brooklyn Reserve might be a bit too steep for some members)

I will leave it to you to choose what to take photos of this month, could be autumn colours but the choice is yours.

Maureen Hutton
