

May Dig Report

Hi everyone

Sorry, I forgot the report, I put it on the web page but forgot to send it to you.

Six of us went to Nelson Museum to see the National Geographic 50 best photos. Afterward, we went for afternoon tea, a very enjoyable outing.

They were well worth the visit, one was a horizontal panorama of a tree. So I set you a challenge for next month - I want you to do a panorama picture it can be vertical or if you feel like having a go at a horizontal please try, just remember to take your photos with a steady hand (better to use a tripod) also make sure you have at least a 25% overlap and not too many photos. The more photos you may get a very narrow picture.

I will show how to do a panorama with digital image if anyone wants to know how.

Maureen
